Because...

Together x Sustainable = Stronger

More with less

**Increase food
production...**

**...and halve the
ecological impact**

Food loss is a key issue - do we know our value chain

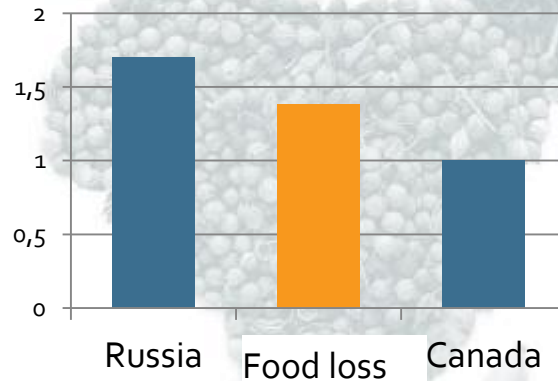

Opportunities are around – if we look for them

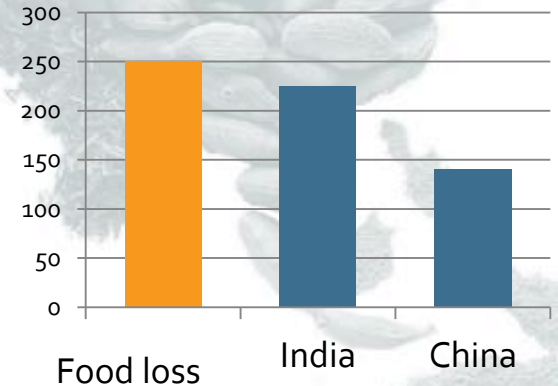

Global greenhouse gas emissions (Gt CO₂-e)

Global land area (billion hectares)

Global bluewater consumption by agriculture (cubic km)

Food loss – throughout the supply chain

In developed regions: much by consumer ('waste');

In developing regions: much in supply chain ('loss')

Rabobank's view in co-creating the value

- Stimulate innovation and sustainability among entrepreneurs
- Fueling societal debate
- Connecting entrepreneurs
- Facilitating frontrunners and sustainable projects from a banking perspective
